In the specification

Please replace the paragraph on page 4, lines 6-17, with the following paragraph:

Figure 1 is a block diagram showing a prior art application of a job ticket service. Job tickets are often associated with a printing standard, the job definition format (JDF). The JDF is described in detail in JDF Specification Draft Spiral 4.0, available at the Internet web site www.hp_opensource.com, which is hereby incorporated by reference. In Figure 1, a user 1 generates a job request and sends the job request through a portal 4 to a processor 5. The job request may include a job ticket data file 2 and a content file 3. The user 1 may be a computer terminal in a networked computer system and the processor 5 may be a networked printer. The job request may involve printing a document. The document may be represented by the content 3, which is a digital representation of text and images to be printed. The intended format of the printed document may be described in the job ticket file 2, which is simply a digital file that specifies how the printer is to print the document. For example, the job ticket file 2 may require that the document be printed on back-to-back pages.
